PROJECTS

MyDog (Web Site)

- Fronted for dog selling site.
- I used HTML , CSS Bootstrap to build this site.
- https://github.com/GopalDubey57/Mydog

Real Estate House Price Predictor (AI/ML)

- I made this project using various python modules such as(sklearn, pnadas, numpy, joblib, matplotlib).
- I Tried various regression models and chose the best for predictions It can predict correct price for property by using that company can make profit by buying property at right cost.
- https://github.com/GopalDubey57/Price-Predictor

NewsTonic (News Website) (Web development)

- Made using MERN stack.
- It is made to fetch news using API. React-router-dom is used. function based approach is used here.
- https://gopaldubey57.github.io/NewsTonic/

iNoteBook (Fullstack project to where you can Signin/Login and create notes)

- You can create notes by using this website.
- I have build frontend as well as backend in this project.
- Complete MERN project frontend
- https://github.com/GopalDubey57/Back_End
- https://gopaldubey57.github.io/iNoteBook/ (website)

SKILLS

Web Development| React js, HTML, CSS, JavaScript

Machine Learning| Python, SQL

Applications| MS Excel, Power BI

Programming Languages| Java, C++

COURSEWORK

Data Structure and Algorithms

Machine Learning

Operating Systems

Database Management System

Education

SRM Institute of Science and Technology

B.Tech, Electrical and Computer Engineering, may 2023| Chennai, India

CGPA: 9.1/10
